Introduction:

Easy Attender 1.2 is Asterisk base application that works with Asterisk (world most famous Open Source Telephony Engine) It core concept is using AGI (Asterisk Gateway Interfacing) that connect asterisk to MySQL database and base on Caller ID it takes decision to route the incoming calls to various routes and is able to capture the DTMF code pressed by callers for certain action.

Easy Attend has reliable voice engine that provide full features IP-PBX features as well like voicemail, voicemail to email, call back, unlimited extensions, IVR (Interactive Voice Response)

For full list of features please see the online website <http://www.numankhan.com>

Easy Attender (About the Product)

NUMANKHAN.COM brings you, easy to use Order Booking System that helps your business to take order through telephone and then do the delivery services. For example if you are having restaurant, hotel, drinking water delivery or any services supply, which requires your valuable customers to call your business.

Easy Attender is voice driven telephone system that helps your business clients/customers to place or book order for your goods or services.

Easy Attender is capable to entertain the callers, as soon as they in touch with your business, It can locate the clients/customers physical address and the quantity of the orders that caller books via phone.

You can search your clients/customers order by using searching features which is built in available in Easy Attender. Searching can be done date wise, location wise, client/customer wise and vice versa

Easy Attender also gives an option to your caller to drop the voicemail to your company and you can retrieve the voicemail via your phone or through web interface, in this way you are full time connected to your business caller and can have more revenue on your business.

Hardware Requirements for Easy Attender

Easy Attender requires you to have IP-PBX (IP Based Private Branch Exchange) at your back office that can take external calls via PSTN line.

The Team

Team behind Easy Attender

At NUMANKHAN.COM we define Team as Together Everyone Achieve More (T-E-A-M), with this passion. Team at NUMANKHAN.COM has done a really hard work to get the job done.

Numan Khan (Core Software Engineer for Easy Attender) has great motivation and passion for the software development, The development of Easy Attender was itself not less than a challenge but he never relax till the job is done.

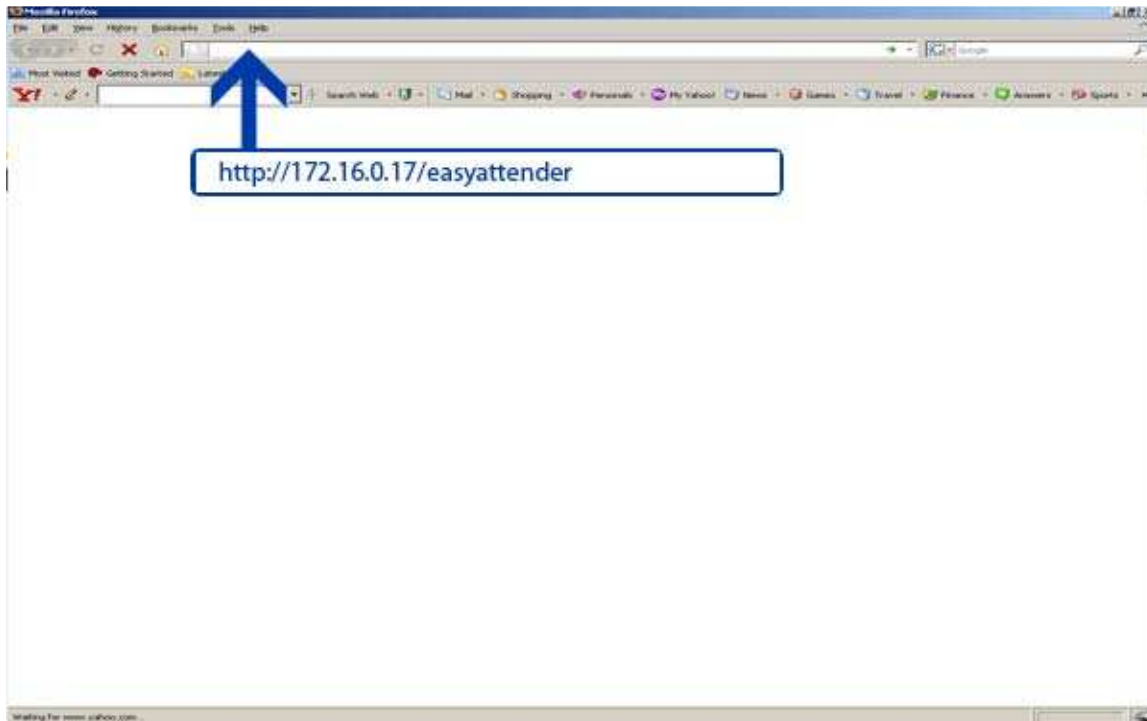

According to Mr. Khan, the development of Easy Attender was not possible without the co-operation of his co-worker.

At the Implementation Phase.

This system is mainly architected and implemented by Numan Khan

Operator Login:

Operators and system Users can login on the system by entering the correct address as supplied by the support person in the address bar of the the browsers IE or Fire Fox (Firefox is recommended).

f On The login page enter your Login Id and Password.

f Press Login Button

Login : operator1

Password: operator1

Note enter the password and login as given by the support person

After the login if successful the users can see the customer orders detailed report with a set of buttons and info on the header and on the report itself each button has a different functionality for the IVR system.

Add Voicemail Orders

Add Voice Recorded Message

Operator can add a voice recorded message on this page.

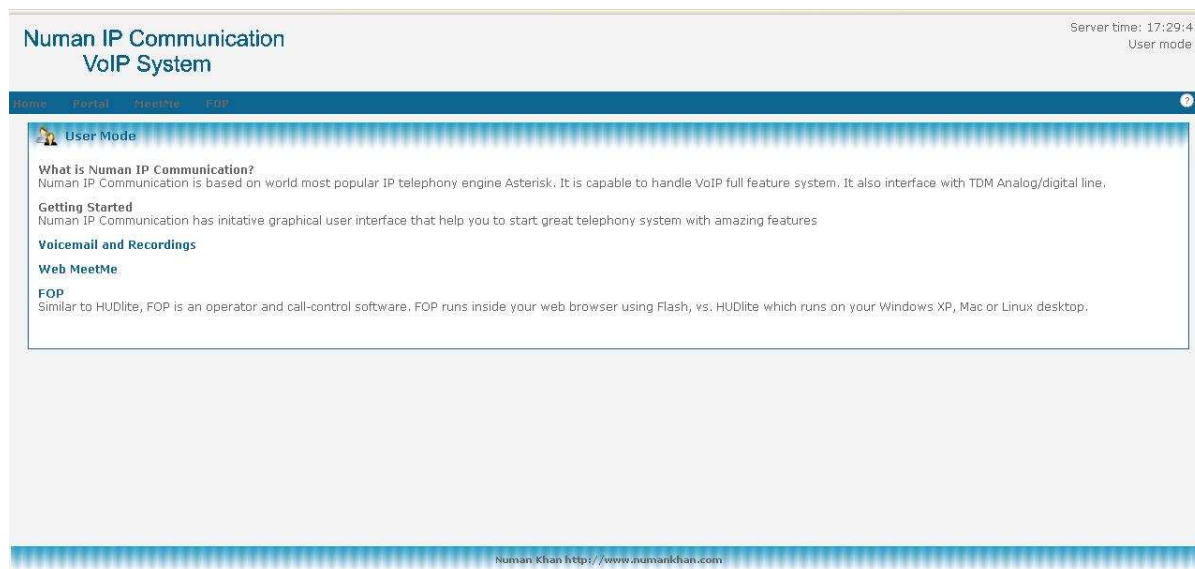

Operator can enter Voice recorded messages with the customer details on this page.

Add Voicemail Order:

CID:	<input type="text"/>	Name:	<input type="text"/>
Phone:	<input type="text"/>	Bottles:	<input type="text"/>
Address:	<input type="text"/>	Type:	<input type="text"/>
Location:	<input type="text"/>	Receive Time:	<input type="text"/>
Order Pass:	<input type="checkbox"/>	Order Pass Time:	<input type="text"/>
Order Deliver:	<input type="checkbox"/>		

Listen Voice Messages

Operator can listen the voice messages by entering the server `http://IP` in the address bar of the internet browser and enter (IP address as provided by support).

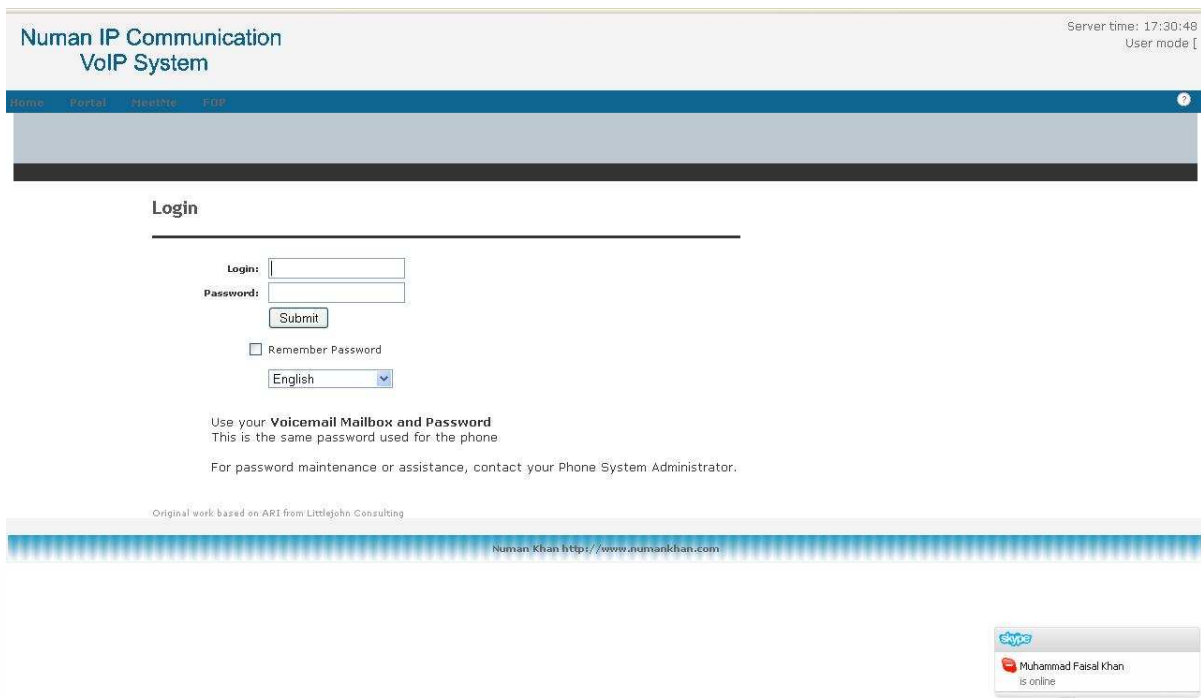

Click on the portal link to enter the login area

Enter your login information Press submit button as same as your extension

Login: 101

Password: 101

Operator can play the messages on the page and perform different functions on this page such as

- **Play the rec message.**
- **Download and save the message if needed**
- **Delete the rec messages**

Organize messages in folders according to needs

Existing Customers

Existing Customers List

Operators can see and manage existing customers basically **View, Edit, and Delete**. Also operator can see the weekly schedule for the customer

There are three buttons for each customer in the grid

View customer details

Edit customer details

Delete Customer

Add New Customers

Add new Customers

Operators can add a new customer from this page.

Call Control

Description:

It is a reporting feature added in the NUMANKHAN.COM Technology Easy Attender Automated IVR System by which the admin users can perform the following tasks,

- **Search all the outbound and inbound calls by**
 - **Date (From and To)**
 - **Time**
 - **Extension**
 - **Dialed number**
 - **Duration**
 - **Status**
 - **Number (search)**
- **View Grid View Report**

Now with the above search criteria it will be easy for the management to see the work load, Total number of calls per Operator or Ext, with date and time. You can take reports as per your need for example if you want to know how much calls have attended by certain operator just you have to select the date desired then select the extension of the operator and press search button. The system will give you a brief column wise report which states all the real time record of a particular operator.

Extension	Number Dialed	Duration	Date & Time	Status
100	050867888	27	2009-12-27 11:05:41	ANSWERED
100	050897777	7	2010-01-03 11:13:55	NO ANSWER
100	055998876	4	2009-12-27 11:14:16	NO ANSWER
100	101	3	2009-12-27 11:14:34	NO ANSWER

Easy Attender User Guide 1.0

Email: info@numankhan.comtech.ae
Web: www.numankhan.comtech.ae

Or admin user can see all the calls made through the system by just entering the start date end date as desired.

Date (From and To)

Users can search the inbound and outbound calls by selection the date range by clicking the calendar icons on the call control feature page.

See below figure 1.1

The screenshot shows a navigation bar with icons for Search Orders, Call Control, Existing Customers, Area List, Help, Change Password, and Logout. Below the navigation bar is a 'Search Parameter' section. The 'Date' field is highlighted with a yellow box and contains 'From' and 'To' date pickers. The 'Extension' field is a dropdown menu with 'Select Extension' selected. The 'Dialed Number' field is an empty text box. A 'Search' button is located below the fields.

Extension

Select the desired extension from the dropdown list for which the report is required.

See figure 1.2

The screenshot shows the same navigation bar as Figure 1.1. In the 'Search Parameter' section, the 'Extension' dropdown menu is highlighted with a yellow box. The 'Date' field is not highlighted. The 'Dialed Number' field is an empty text box. A 'Search' button is located below the fields.

Number (search)

Easy Attender User Guide 1.0

This powerful option for admin users. Admin user can search for a particular number all outbound/inbound calls made to that particular number will be listed in the report it can also be more descriptive if a particular date and extension is also selected for the said so it will help the management to see the operator activity for a particular number also.

See figure 1.3

The screenshot shows a navigation bar with icons for Search Orders, Call Control, Existing Customers, Area List, Help, Change Password, and Logout. Below the navigation bar is a 'Search Parameter' section with the following fields:

- Date: From To
- Extension:
- Dialed Number:
- Search:

Grid View Report

After selecting any of the above search criteria and pressing the search button users can see a detail grid view of the report for the search criteria they have entered.

See figure 1.4

The screenshot shows the same search interface as Figure 1.3. Below the search parameters is a table displaying the results of a search.

Extension	Number Dialed	Duration	Date & Time	Status
100	s	27	2009-12-27 11:05:41	ANSWERED
101	100	7	2010-01-03 11:13:55	NO ANSWER
100	101	4	2009-12-27 11:14:16	NO ANSWER
100	101	3	2009-12-27 11:14:34	NO ANSWER

Area List

Operators can see and add/update/delete geographical areas within the UAE as per their need in easy to enter form.

 Home  Add Area  Change Password  Logout

Customer Area List

Area Code

Area Description

	View	Edit	Delete	Area Code	Description
				JM	Jumerah
				DS	Discovery Garden
				SP	Spring
				GR	Greens
				SZH	Sheik Zayed Road

Change Password

Operators can change their password from this page.

The screenshot displays the user interface for the Easy Attender 1.0 Automated Delivery System. At the top left, there is a logo for 'Easy Attender 1.0' and the text 'Automated Delivery System by NSD Technology www.nsdtech.ae'. On the right side, there are two navigation icons: 'Home' (represented by a house icon) and 'Logout' (represented by a mobile phone icon). The main content area is titled 'Change Password' and contains three input fields: 'Old Password', 'New Password', and 'Confirm Password'. Below these fields are two buttons: 'Save' and 'Cancel'. At the bottom of the page, there is a copyright notice: 'Copyright 2008 © NSD Technology All rights reserved http://www.nsdtech.ae'.

Softphone Account

To make a new extension on the softphone Xlite Follow the steps

- Open the application xlite from windows start menu
- Click on sip account settings
- Click on add button
- Then add the server IP address Ext desired and display Name and press ok.

- Make sure that the ext you have entered is already registered with the server if you are not sure kindly contact the support person.

ATA Device Integration

ATA Device is small and compact device used to connect the IP-PBX with analog phone set. It takes input from the local Ethernet and converts it to the analog phone call, in brief one can use analog phone set with modern IP PBX telephone system with the advent of this device.

SMS Gateway Integration

Easy Attender 1.2 has now built in feature for SMS (Short Message Service).
It Support one way/two way SMS.

As soon it receives the order, it can send the order confirmation information via SMS or can deliver the order information to the delivery person automatically.

The SMS module is not available with Standard Easy Attender. It can be purchased separately and can be easily Integrated with the Standard Easy Attender.

The volume of SMS, depends on End User(s).

Easy Attender Plus comes with free 25 messages as Test Trial

Suggestions and Feedback
